EDUCATION

Georgia Institute of Technology

Master of Science in Analytics

Atlanta, GA

Expected 2027

Arizona State University

Bachelor of Science in Computer Science

Tempe, AZ

Graduated Dec. 2023, Cum Laude

EXPERIENCE

Data Analyst Intern

Trinamix Inc.

Aug 2023 – Jan 2024

San Jose, CA

- Strengthened system security by conducting a data integrity audit on an internal tool; identified and reported over 15 critical access discrepancies, leading to a revision of user access protocols.
- Identified security vulnerabilities by querying and validating thousands of log entries with SQL, which led to the remediation of 5 unauthorized access points and enhanced compliance with internal security protocols.
- Monitored system logs to ensure compliance with internal security protocols and maintain the integrity of user data.

Freelance Developer

Yanbor LLC.

Jan 2023 – Dec 2023

Tempe, AZ

- Led the technical redesign of a core business application, improving platform performance by 25% and modernizing the user interface to enhance usability.
- Engineered a critical data processing tool in Python to parse and optimize large, complex files, reducing processing time by 27% and ensuring 100% data integrity for system compatibility
- Designed a robust file handling system that segmented large files into 4MB chunks, preserving structural integrity to meet legacy system constraints.
- Managed project priorities and coordinated tasks using a Jira-based workflow to ensure timely completion.

RELEVANT COURSEWORK & PROJECTS

ISYE 6740: Computational Data Analysis

Georgia Institute of Technology

In Progress

- Developed and evaluated predictive models for complex regression and classification tasks, achieving 92% accuracy on benchmark datasets.
- Developed predictive models for regression and classification tasks using Ridge/Lasso and tree-based methods, validated with 10-fold cross-validation

ISYE 7406: Data Mining & Statistical Learning

Georgia Institute of Technology

In Progress

- Implemented core machine learning algorithms from scratch in Python, including PCA, K-Means Clustering, and Support Vector Machines, to analyze their computational performance.

EXTRA-CURRICULARS

Vice President, Interior

Beta Chi Theta

Jan 2022 - Dec 2022

Tempe, AZ

- Collaborated with leadership to revamp organizational structure, leading to an increase in member engagement.
- Mentored new members, fostering leadership development and promoting higher fraternity participation and retention.

TECHNICAL SKILLS

Proficient: Python, R, SQL, Java

Familiar with: C#, VB, HTML/CSS, MATLAB, Git

Libraries & Frameworks: Pandas, NumPy, Matplotlib, .NET

Developer Tools: PostgreSQL, Jira, Wireshark, Excel
